AUTHOR'S NOTE	17
GENERAL INTRODUCTION	19

PART I FOUNDATIONS: THE ASSET AND THE RELATIONSHIP

CHAPTER 1. DIGITAL ASSETS AS OBJECTS OF PRIVATE LAW	27
I. Introduction: The Classification Problem and Why It Cannot Be Avoided	27
II. The Concept of Digital Assets: Definition, Scope and the Functional Approach	29
III. The Taxonomy That Matters for Private Law: Native Assets, Tokenised Rights and the Space Between	33
IV. Digital Assets and the Law of Property: An Architecture Built for Another World	37
V. Control as the Functional Substitute for Possession: Concept, Limits and Implications	46
VI. Digital Assets in Comparative Case Law	51
CHAPTER 2. CUSTODY, CONTROL AND PRIVATE LAW CLASSIFICATION	59
I. Introduction: Why Custody Is the Central Private Law Problem of Digital Asset Markets	59

II. What Is Digital Asset Custody? A Private Law Definition	59
III. Custodial Models: Architecture, Legal Consequences and Risk Profiles.	64
IV. Who Provides Digital Asset Custody? Exchanges, Banks and Specialist Custodians.	67
V. Digital Vaults and Key Management: Technical Infrastructure and Legal Characterisation	72
VI. The Private Law Classification of Digital Asset Custody: Deposit, Mandate, Fiduciary Relationship or Regulated Service?	75
VII. The DeFi Governance Gap: Private Law Without a Custodian.	82
VIII. Custody as a Legal Relationship, Not a Technical Arrangement	90

PART II THE CUSTODIAL RELATIONSHIP AND ITS LIFECYCLE

CHAPTER 3. THE CUSTODIAN'S DUTIES AND LIABILITY.	95
I. Introduction: Duties as the Private Law Content of Custody.	95
II. The Duty of Safekeeping: From Vault to Code	96
III. Segregation: The Institutional Linchpin of Custodial Client Protection ...	99
IV. The Duty of Restitution: Return on Demand and Its Limits	102
V. Prohibition on Rehypothecation and the Use of Client Assets.	104
VI. Cybersecurity and Operational Resilience as Legal Obligations.	108
VII. The Duty of Information and the Accountability Framework	110
VIII. Liability: Standard of Care, Burden of Proof and Comparative Approaches	112
IX. Automated Custody: Smart Contracts, Oracles and the Attribution of Automated Acts	119
X. The Integrated Architecture of Custodial Duty and Liability.	125
CHAPTER 4. INSOLVENCY OF DIGITAL ASSET CUSTODIANS.	127
I. Introduction: Why Insolvency Is the Stress Test of Custody Law	127
II. The Core Question: Client Asset or Estate Asset?	128
III. Segregation in Insolvency: Protection, Failure and Proportional Allocation.	132
IV. Trust, Fiduciary and Civilian Approaches to Custodial Insolvency Protection.	135
V. The Landmark Cases: Celsius, FTX, Cryptopia, Mt. Gox and BitGrail. ...	138
VI. Cross-Border Insolvency Dimensions	145
VII. Reform: Towards an Adequate Insolvency Framework for Digital Asset Custodians	149
VIII. Contract and Segregation as Proprietary Fate	153

CHAPTER 5. DIGITAL SUCCESSION AND CUSTODIAN DUTIES	155
I. Introduction	155
II. The Succession Problem: Scale, Legal Structure and the Custodian's Position	156
III. The Custodian's Obligation: A Model Post-Mortem Access Clause	161
IV. Private International Law of Digital Succession	164
V. Data Protection, Confidentiality and the Custody Relationship	168
VI. CBDs and State Custody: Disintermediation, Succession and Constitutional Limits	172

PART III COORDINATION ACROSS BORDERS

CHAPTER 6. CROSS-BORDER DIGITAL ASSET CUSTODY AND PRIVATE INTERNATIONAL LAW	177
I. Introduction: The Private International Law Problem of Digital Asset Custody	177
II. The Failure of <i>Lex Situs</i> : Structural, Not Technical	178
III. The Three Distinct Conflict-of-Laws Questions in Digital Asset Custody	182
IV. Comparative Connecting Factors: A Critical Survey of Seven Jurisdictions	186
V. UNIDROIT Principle 5: The Waterfall Architecture and Its Evaluation.	193
VI. The Functional Connecting Factor: The Effective <i>Locus</i> of Control over Key Management	195
VII. Jurisdiction, Enforcement and the Persons Unknown Problem	206
VIII. Custody Chains, Sub-Custodians and Transnational Layered Risk	209
IX. Beyond <i>Lex Situs</i> : Findings and the Case for Reform	213
CHAPTER 7. CROSS-BORDER DIGITAL ASSET CUSTODY: A COMPETITION-SENSITIVE CONFLICTS FRAMEWORK	215
I. Introduction: The Structural Argument	215
II. The Structure of the Digital Asset Custody Market and the Role of PIL Fragmentation	216
III. MiCA's Custody Framework: Achievements, Structural Gaps, and Competitive Effects	220
IV. PIL and Competition Law in Digital Asset Custody: The Three Dimensions	222
V. The Competition-Sensitive Conflicts Framework: The Fully Elaborated Form	226
VI. CBDs and the State as Custodian: Competitive Neutrality Imperatives	233

CHAPTER 8. TOWARDS A TRANSNATIONAL PRIVATE LAW OF DIGITAL

ASSET CUSTODY	237
I. Introduction: The Constructive Agenda	237
II. Theoretical Framework: Functional Coordination Without Uniformity	238
III. Ten Principles for a Transnational Private Law of Digital Asset Custody	241
IV. The Institutional Architecture for Implementation	256
V. The Horizon: AI, Quantum Cryptography, CBDCs and the Next Generation of Challenges	263
GENERAL CONCLUSION	267
The Argument in Synthesis	267
The Three Structural Transformations	267
The Contribution	268
What the Ten Principles Achieve	269
The Institutional Pathway	269
The Research Agenda That Remains Open	270
The Closing Argument: Why Private Law Matters More Than Regulation.	271
BIBLIOGRAPHY	273
